

Simple Calculator

Create python GUI application that allow the user to add or multiply two numbers. The user should be able to select the operation e.g. add or multiply using radio button, then enter two numbers and click the submit button. The application should then perform the operation and display the result as show in figure

Simple Calculator

☒ Add

☐ Multiply

6

3

Submit

Result = 9

By your name and number

Note:

- Create the User Interface as shown above
- Customize the interface to make it unique
- submit the complete source code with the final output as the last step
- Add comments to your program
- submit screenshot of the application
- **Late Submissions will not be accepted/ Marked**
