Assignment # 10

----

localStorage in JavaScript

Refer to the following tutorial
https://blog.logrocket.com/localstorage-javascript-complete-guide/
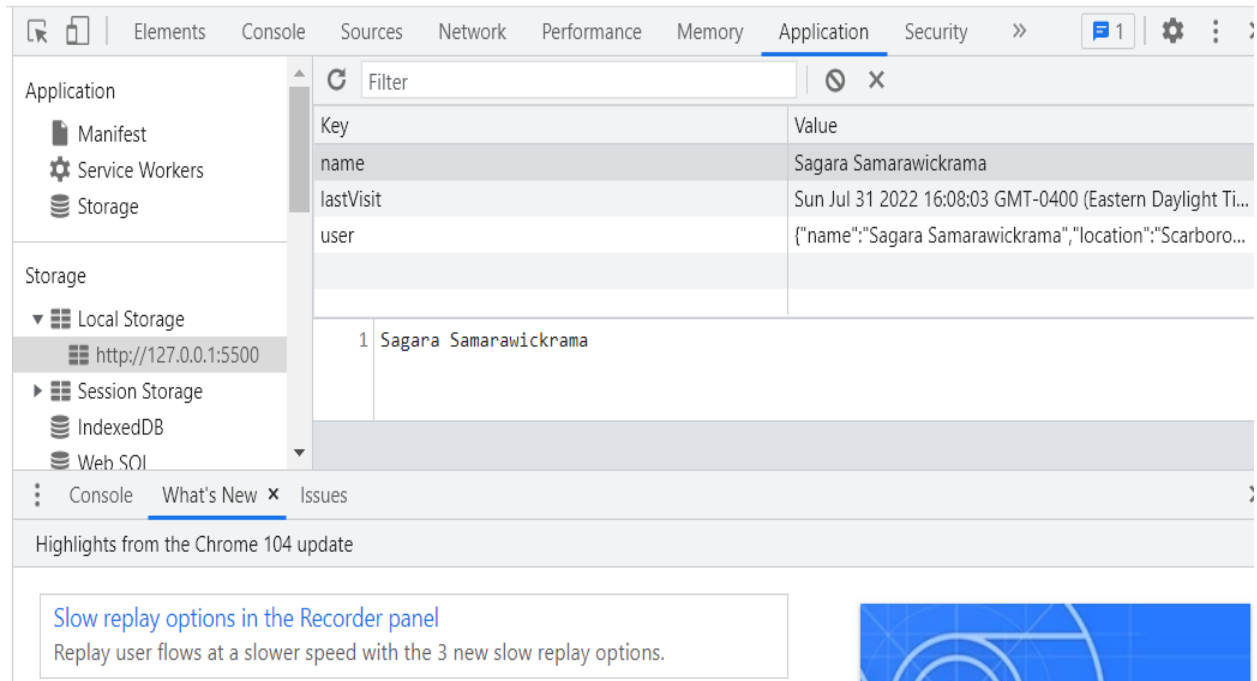

Perform the following activities with screen shots

a. How to store values in local storage
b. How to get items from local storage
c. How to delete items in Local Storage

- Use your name and location when you store the data

Sample Screen shot

Guideline:

1. ***Explain the methods we use to store the data and retrive the data***
2. Try your best to make your code unique
3. Show all the screen shots in word format
4. Create a folder **<YourStudentNo_Assn10>**. Copy all the related files to that folder including word document. Now make a zip file and <u>upload to Moodle before the deadline.</u>

Late assignments will not be accepted or marked!

Copied assignments will be marked as 0 for all the parties involved
