Question 1:

Puppy Age Calculator

Puppy's Age 1: | 1

Puppy's Age 2: | 2

Puppy's Age 3: | 3

Calculate Age

Your doggie 1 is 7 years old in dog years!

Your doggie 2 is 14 years old in dog years!

Your doggie 3 is 21 years old in dog years!

Question 2:

The Lifetime Support Calculator of your favourite snack

Your current Age(1): | Enter your current age | Amount you consumed per day(1): | Enter amount you comsume daily

Your current Age(2): | Enter your current age | Amount you consumed per day(2): | Enter amount you comsume daily

Your current Age(3): | Enter your current age | Amount you consumed per day(3): | Enter amount you comsume daily

Calculate

The Lifetime Support Calculator of your favourite snack

Your current Age(1):	12	Amount you consumed per day(1):	998
Your current Age(2):	34	Amount you consumed per day(2):	7866
Your current Age(3):	77	Amount you consumed per day(3):	99

Calculate

You will need 32055760 to last you until the ripe old age of 100

You will need 189491940 to last you until the ripe old age of 100

You will need 831105 to last you until the ripe old age of 100

Question 3:

The Geometrizer

Radius | Enter the radius

Calculate Circumference   Calculate area

The Geometrizer

Radius	23

Calculate Circumference   Calculate area

The circumference is 144.51

The Geometrizer

Radius	55

Calculate Circumference   Calculate area

The area is 9503.32

Question 4:

Temperature Converter

Celsius	Enter the Celsius value	Fahrenheit	Enter the Fahrenheit value

Celsius to Fahrenheit   Fahrenheit to Celsius

Temperature Converter

Celsius   [39]   Fahrenheit   [Enter the Fahrenheit value]

[Celsius to Fahrenheit]   [Fahrenheit to Celsius]

39°C is 102.20°F

Temperature Converter

Celsius   [Enter the Celsius value]   Fahrenheit   [89]

[Celsius to Fahrenheit]   [Fahrenheit to Celsius]

89°F is 31.67°C
